diegopastor.me
Querétaro, México
(Dual Citizenship : México - Spain)

PROFILE

Passionate about Computer Science, Mathematics and Physics. Enthusiastic about Open Source. I love to build and break things. Some things I love to do are: Running, drinking "Mate", playing team video games and competitive programming.

EDUCATION

Bachelor of Science - BS
Computer Science, Software Engineering
Universidad Autónoma de Querétaro 2015 - 2019(January)
GPA 92 / 100

Exchange Program
Cloud Computing and Big Data Analysis
Universidad Complutense de Madrid 2017 - 2018

EXPERIENCE

Back-end Developer
Centro de Desarrollo - UAQ
Aug 2018 - (Present)

Freelance Tester
Global App Testing
Aug 2017 - Jan 2018
Worked in various "Mexico Usability Surveys" where my job was to revise translations from English to Spanish in certain applications. Worked in various "Functional Exploratory Cycles" where my job was to find and track bugs in certain applications.

Social Media Marketing
2012 - 2014
Worked on building the brand 'dieggopastor' Created content for various platforms and the movement got over 90,000 subscribers on YouTube, 50,000 followers on Twitter and 30,000 followers on Instagram. Travelled around Mexico along other content creators to show our content live. Worked for many brands on marketing campaigns.

PROJECTS

@BotRealMagico - Twitter Bot
A Twitter bot that automatically generates and tweets a "Magic Realism" story in Spanish every 4 hours. Made with Python and MySQL.

LANGUAGES

Spanish - (Native)
English - (C1)
French - (B2)

SKILLS

- **Python:** My strongest programming language. I have used it extensively for building scripts and as a backend with Django.
- **C++ :** My go-to language for competitive programming. Have used it for creating data-structures and algorithms to solve programming challenges online. Examples can be found on my **GitHub Page**
- **JavaScript:** Experience building full-stack web applications with React, Redux, Express, Node.js and MongoDB. Examples can be found on my **Github Page**
- **HTML:** 3+ years experience
- **CSS:** 3+ years experience. SASS preprocessor experience and templating using frameworks like Bootstrap
- **Git:** Experience working on projects with multiple developers. 3+ years using git for all my projects.
- **API Development**
- **Heroku:** Experience pushing projects to heroku.
- **Driven**
- **Team Work**
- **Quick Learner**
